

DX-ZD6UE – HDD Extension unit

Key Features

- 2 x 2TB hard drives can be installed for a total of 2 Terabytes worth of storage (with Spanning* mode)
- USB connection/cable included
- Connect to any Mitsubishi DVR system
- Quick and easy setup
- Direct connections to PC for faster data transfer
- HDD Sleep mode for longer HDD life
- Mirroring mode for data redundancy
- Self clear function for serviceability improvement
- Optional rack mount kit available

* One HDD failure makes both unusable.

Designed exclusively for use with the Mitsubishi Electric Digital Video Recorder range, the DX-ZD6UE offers all the extra storage you'll ever need. The DX-ZD6UE can hold two SATA hard drives, and up to 14 units can be connected to your Mitsubishi DVR for powerful, long-term recording capability.

Installation is quick and simple thanks to the USB connectivity on the DX-ZD6UE - once you plug it in, the DVR will automatically detect the extension unit and calculate how much additional storage it creates. An optional rack mount kit is also offered. Simple, powerful and reliable, the DX-ZD6UE makes longer-term recording of the DX-TL5000E quick and easy.
